

We Claim

1. A solvent based coating composition comprising
 - A) at least one toner base comprising an acrylic polyol, a cellulose resin, a polyester polyol, and a pigment,
 - B) at least one connector base comprising at least one resin compatible with the resins mentioned in toner base A), and
 - C) at least one reducer base free of resins and pigments.
2. The coating composition according to claim 1, wherein the compatible resin in the connector base (B) is selected from an acrylic polyol, a cellulose resin, a polyester polyol, a polyurethane polyol, a vinyl resin, a polyisocyanate, and/or mixtures thereof.
3. The coating composition according to claim 1, wherein the toner base (A) comprises at least 25 wt.% on solids of resins and connector base (B) comprises at most 75 wt.% on solids of resins.
4. The coating composition according to claim 1, wherein the toner base (A) and connector base (B) together comprise the following resins:
 - 10 - 40 wt.% on solids of cellulose resin,
 - 25 - 60 wt.% on solids of acrylic polyol,
 - 15 - 45 wt.% on solids of polyester polyol, and
 - 0 - 20 wt.% on solids of a compatible resin,the sum of the wt.% indicated for the resins always being 100 wt.%.
5. The coating composition according to claim 1, wherein the connector base (B) comprises the same type of resins as toner base (A).
6. The coating composition according to claim 1, wherein the connector base (B) comprises the same resins as toner base (A).

7. The coating composition according to claim 1, wherein the coating composition additionally comprises a cross-linker base (D).
8. The coating composition according to claim 6, wherein the cross-linker base (D) comprises an isocyanate hardener.
9. A base coat composition, comprising a coating composition according to claim 1.
10. An interior coating composition, comprising a coating composition according to claim 1.
11. A method of refinishing a car using the base coat composition according to claim 9.
12. A method of refinishing a car using the interior coating composition according to claim 10.
